STATEMENT ON PFAS SUBSTANCES

KHATOD OPTOELECTRONIC S.r.l. hereby declares that all plastic products supplied do not contain any substances that fall into the category of PFAS.

PFAS (Per- and polyfluoroalkyl substances) are a large group of synthetic chemicals that are widely used.

Some of them such as PFOA (Perfluorooctanoic acid), PFOS (Perfluorooctane sulfonic acid) and their salts are already banned and restricted by the European legislation in force.

We understand that PFAS substances are persistent and bio-accumulative in the environment and generate adverse effect on human health. We have always kept on tracking the update of prohibited and restricted substances listed both in POPs and REACH Regulations and in the other applicable ones and verify the presence of any substance in our products.
